May 1, 2014

Dear Reader and Interested Citizen:

Addendum No. 43 to the Final Environmental Impact Statement (FEIS) for the Snohomish County GMA Comprehensive Plan 10-Year Update, issued on May 1, 2014, has been prepared by Snohomish County Planning and Development Services. This addendum provides additional environmental information on the anticipated impacts from the proposed Stormwater Management - GPP 5 amendments to the General Policy Plan (GPP) included in county council's Amended Motion 11-164 establishing the initial list of county-initiated amendments.

This addendum adds further information to the analysis contained in the DEIS and the FEIS to the 10-Year Update of the Comprehensive Plan in 2005. The document contains additional environmental information related to the proposed amendments to the Land Use and Natural Environment chapters of the GPP. It does not identify detailed project impacts. Specific project actions will require further detailed environmental review as they are considered for implementation.

Review of these proposed comprehensive plan amendments will occur at a public hearing before the Snohomish County Planning Commission scheduled for May 27, 2014, and at a subsequent briefing and public hearing before the Snohomish County Council. The proposed comprehensive plan amendments may be accessed through the Planning Commission's website on its agenda for the public hearing.

We invite you to comment on these proposed amendments during the County review process. If you have any questions concerning this addendum or the proposed amendments, please contact Eileen Canola at (425) 388-3311 ext. 2253.

Sincerely,

Clay White, Director
Planning and Development Services

Date of Issuance: May 1, 2014

FACT SHEET

Project Title:	GMA Comprehensive Plan (GMACP) General Policy Plan (GPP) amendments related to Stormwater Management (GPP5)
Proposed Non-Project Action:	The proposed non-project action is the adoption by the Snohomish County Council of amendments to the policies of the Snohomish County GMACP.
Purpose of the EIS Addendum:	<p>This addendum adds information relating to the non-project programmatic county action described above. This information does not result in any new significant adverse environmental impacts and does not change the analysis or the conclusions of previously identified significant impacts of the alternatives to the county's GMACP within the previously issued SEPA documents dated May 5, 2004, (Draft EIS) and December 13, 2005, (Final EIS).</p> <p>This addendum is being issued in accordance with WAC 197-11-625 and WAC 197-11-630. The adopted environmental documents listed herein, together with this addendum, meet Snohomish County's environmental review needs for the current proposed amendments.</p>
Description of Proposal:	<p>Consider proposed amendments to the policies of the Snohomish County GMACP General Policy Plan (GPP) Land Use Chapter and Natural Environment Chapter. The Growth Management Act (GMA), RCW 36.70A.070, requires that the comprehensive plan be an internally consistent document and the GMA also requires that any amendment or revision to development regulations be consistent with and implement the comprehensive plan (RCW 36.70A.130). This Stormwater Management proposal is necessary to provide Comprehensive Plan consistency with the anticipated updates to the County's stormwater regulations and the new requirements in the County's 2013 NPDES Phase I Permit. A new provision of the 2013 NPDES Permit requires low impact development (LID) techniques, where feasible. The proposed updates to the County's stormwater regulations include this required LID language, as well as new terminology and other requirements. This proposal contains the following amendments to the GPP to acknowledge new terminology and LID requirements.</p> <ol style="list-style-type: none">1. Deletes Land Use Policy 5.B.13 as it is no longer necessary to distinguish LID requirements for a particular area.2. Amends Land Use Policy 6.E.8(d) to update for terminology in the 2013 Permit.3. Amends Land Use Policy 6.G.7(d) to update for terminology in the 2013 Permit.4. Amends Natural Environment Policy 1.C.1 to add LID and site planning to the list of strategies for protection of water resources.5. Amends Natural Environment Policy 3.H.3 to clarify that the LID requirements pertain to areas and situations where feasible.

6. Deletes Natural Environment Policy 3.H.4 as this policy was a remnant from the previous NPDES.
7. Adds new Natural Environment Policy 3.H.7 to capture the 2013 Permit requirements pertaining to LID, where the permit applies.

Location of Proposal: Unincorporated Snohomish County

Action Sponsor Lead Agency: Snohomish County Department of Planning and Development Services
3000 Rockefeller Avenue, M/S #604
Everett, Washington 98201-4066

Required Approval Review: Snohomish County Council – adoption of ordinance
Washington State Department of Commerce – coordination of state comments

Circulation and Comment: This addendum, or notice of availability, is being sent to all recipients of the previously issued Draft and Final EIS for the 10-Year Update of the GMA Comprehensive Plan as required by WAC 197-11-625. No comment period is required for this addendum under WAC 197-11-502(8)(c).

The EIS Addendum is available by contacting: Eileen Canola, Planner
Snohomish County Council
3000 Rockefeller Ave., M/S #604
Everett, Washington 98201
Phone: (425) 388-3311 ext 2253

The proposed Stormwater Management -GPP5 amendments are also available for viewing at the Planning and Technology Division of the Snohomish County Department of Planning and Development Services (County Administration Building West, 2nd Floor) and on the county's website. Visit www.snoco.org and type "*Plans and Reports*" in the search box and select Environmental Documents.

ENVIRONMENTAL REVIEW

Overview:

The adoption of amendments to the GMA Comprehensive Plan is a non-project action under the Washington State Environmental Policy Act (SEPA). This Addendum is not intended to satisfy individual project action SEPA requirements (the review needed for a future site-specific land use or building permit application). This Addendum does not significantly change the analysis of impacts and alternatives contained in the Environmental Impact Statement (EIS) prepared in 2005 for the GMA Comprehensive Plan, nor does it identify new or significantly different impacts.

Prior Environmental Review

The county published the EIS for the county's updated GMA Comprehensive Plan in 2005, in accordance with the review cycle required by the Growth Management Act (GMA). The Draft EIS was issued on May 5, 2004, and the Final EIS was issued on December 13, 2005. The elements of the environment addressed in both of these EIS documents included elements of both the natural and built environment: earth, air, water, plants and animals, energy and natural resources, environmental health, population and employment, land and shoreline use, transportation, public services, and utilities.

EIS Addendum

The proposed revisions will not change any existing land uses or their impacts. The proposed revisions will, if enacted, provide a voluntary incentive program to conserve designated farm and forest land. Additional environmental review will occur if program implementation will result in substantive environmental impacts.

According to the SEPA Rules, an Addendum to an EIS provides additional analysis and/or information about a proposal or alternatives where their significant environmental impacts have been disclosed and identified in a previous environmental document (WAC 197-11-600(3)(b)(ii)). An Addendum is appropriate when the impacts of the new proposal are the same general types as those identified in the prior document, and when the new analysis does not substantially change the analysis of significant impacts and alternatives identified in the prior environmental documents (WAC 197-11-600(4)(e), WAC 197-11-706).

This Addendum to the GMA Comprehensive Plan EIS is being issued pursuant to WAC 197-11-625 to meet the county's SEPA responsibility. The GMA Comprehensive Plan EIS evaluated plan alternatives and impacts that encompass the same general policy direction, land use patterns, and environmental impacts that are expected to be associated with the proposed amendments identified in this Addendum.

No additional significant impacts beyond those identified in the county's EIS for the 10-Year Update are expected to occur. No additional programmatic level environmental review will be required to the extent that the existing environmental documents listed in this addendum or other published documents have analyzed such changes.
